

ACTIONABLE INTELLIGENCE

"I have known and worked with Jonathan for many years. I consider him a mentor, good colleague and a friend.

Jonathan has deep knowledge and many valuable skills that are demonstrated throughout his career and leadership.

One of the aspects which I appreciate the most is his ability to mine business data, apply significant expertise and draw out actionable intelligence to drive business decisions.

He understands the weight of the "micro", while extrapolating that knowledge into "macro" planning and strategic direction for the business."

OUR SERVICES

STRATEGY and OPERATIONS

We have worked through all layers and levels of an organization, making it second nature for our team to translate a strategy into operations.

OPERATIONAL EXCELLENCE

We have decades of Operational Excellence, Total Quality Management (TQM), Lean and Six Sigma Experience. We roll up our sleeves to help your company's team members achieve success in process and quality objectives.

FRACTIONAL LEADERSHIP

We are able to serve your organization in leadership roles. It may be a need for just a few hours a week or month to larger engagements.

COACHING

We will work with you 1:1 to propel your career and life forward.

BUILDING BUSINESS PLANS

From **STRATEGIC BUSINESS PLANS** to **TRANSFORMATION PLANS**, our decades of experience will help you to drive actionable, achievable and measured business objectives. Many companies can help write a plan that soon becomes something placed on a shelf. We write plans that are succinct, easy to read and simple to cascade.

SUPPLY CHAIN EXCELLENCE

From **Forecasting** to **Procurement** to **Manufacturing** to **Logistics**, we are here to support and improve your processes. We have orchestrated strategic and tactical improvements in **Supply Chains**. We are experienced in turn key manufacturing as well as business process supply chain in hospitality, marketing, travel and corporate shared services.

PERFORMANCE MANAGEMENT

A company must know where it is going... and to really succeed, a company must measure their progress against the strategic goals or success factors. The big consultant groups will tell you that you need to invest inordinate amounts of money in data lakes. We will leverage your existing data platforms as we help you design and populate dashboards and scorecards that will measure your key performance indicators.
